

IN THE CLAIMS

Page 11, line 1, change "CLAIMS" to --What is claimed is:--.

Claims 1-10 (cancelled).

11. (new) A headphone with behind-the-head headband comprising:

at least one electroacoustic transducer;

a behind-the-head headband for holding the electroacoustic transducer, said behind-the-head headband having at least a first and a second contact location for contact against a temporal bone of a wearer of the headphone;

spacing between the electroacoustic transducer and the first or second contact location being adjustable;

said behind-the-head headband having a first portion and at least one second portion, said first and second portions coming together at an angle location and a predetermined angle exists between the first and second portions;

said electroacoustic transducer being arranged at the second portion of the behind-the-head headband; and

said electroacoustic transducer being displaceable along the longitudinal axis of the second portion of the behind-the-head headband in such a way that the spacing between the electroacoustic transducer and the first or second contact location as well as the spacing between the behind-the-head headband and the head of a wearer of the behind-the-head headband is adjusted.

12. (New) The headphone as set forth in claim 11, wherein the electroacoustic transducer is adapted to be pivotable about the behind-the-head headband.

13. (New) The headphone as set forth in claim 11, wherein at least one second portion of the behind-the-head headband is designed to be inclined inwardly.

14. (New) The headphone as set forth in claim 12, wherein at least one second portion of the behind-the-head headband is designed to be inclined inwardly.

15. (New) The headphone as set forth in claim 11, wherein the second portion of the behind-the-head headband is convexly bent.

16. (New) The headphone as set forth in claim 11, wherein the electroacoustic transducer has a self-locking arresting action.

17. (New) The headphone as set forth in claim 11, wherein the behind-the-head headband is of an integral configuration.

18. (New) The headphone as set forth in claim 11, wherein the second portion is more flexible than the first portion.

19. (New) The headphone as set forth in claim 11, wherein the behind-the-head headband is of a variable cross-section.
